

The Government Well prospect is at the northern extremity of the Abbots
greenstone belt

Notably, copper assays of up to 19.5% were returned from rock sampling at
Government Well with silver assays up to 275.5 g/t and over 1 g/t gold.

The rock sampling was over a number of small pits which have oxidised base
metal material that has been identified as milled breccia. Results include:

- 14.0% copper, 52.1 g/t silver and 1.1 g/t gold;
- 14.0% copper, 62.5 g/t silver and 1.2 g/t gold; and
- 19.5% copper, 275.5 g/t silver and 1.2 g/t gold.

Cervantes' recent regional soil sampling had highlighted the potential of
structures running through the Abbots Gold Project.

Cervantes executive chairman Collin Vost said: "Abbots is shaping up nicely
as a greenfields project in a high potential area.

"Decades of neglect by explorers have delivered an opportunity to Cervantes
for a discovery."

Proactive Investors facilitate the largest global investor network across 4 continents in 4 languages. With a team of analysts
journalists & professional investors Proactive produce independent coverage on 1000's of companies across every sector for private
investors, private client brokers, fund managers and international investor communities.
