GlobeX Data signs distribution agreement with SYNEX Canada for its Sekur secure email and messaging platform

GlobeX Data Ltd (OTCQB:SWISF)(CSE:SWIS) has signed a nationwide distribution agreement with SYNEX Canada Limited, a wholly-owned subsidiary of leading business services company SYNEX Corporation (NYSE:SNX).

The distribution agreement with SYNEX Canada covers all of Canada and makes available GlobeX's Sekur secure email and messaging solutions to SYNEX.

"We are very happy to have signed a distribution agreement with SYNEX Canada for our Sekur Swiss-hosted communications solution suite, which includes secure email, secure file share and secure messaging," GlobeX CEO Alain Ghiai said in a statement. "We look forward to demonstrating the unique technology and privacy advantages of Sekur to SYNEX Canada's resellers."

Ghiai added: "Whether you are an SME, an enterprise or a government organization, you need protection from email cyber-attacks and data theft. Our strength in using proprietary technology and Swiss privacy laws puts us in a unique position to provide true privacy and security. GlobeX is here to provide the best protection and privacy to all documents, emails and instant message communications."

Sekur, the company's Swiss-hosted secure communications suite, includes encrypted messaging and voice recording transfer with self-destruct timer, an encrypted email account, and a secure file transfer solution. All data is secured using GlobeX's proprietary encryption technology and is hosted exclusively in Switzerland for ultimate privacy.

Sekur includes the company's latest SekurMail technology, which has a proprietary anti-phishing and privacy feature called SekurSend -- in which a user can send an email to any other recipient, whether they have Sekur or not, with complete privacy and security because the email never leaves Sekur's encrypted email servers based in Switzerland.

One of the many privacy and security features of Sekur is that the user does not register with their phone number, eliminating a significant loophole in security and privacy.

Recent data breaches in messaging applications have created a certain urgency for businesses and data privacy advocates to protect their communications from cyber-attacks and identity theft via mobile and desktop devices.
